Two Layer Coverage for Dhaka Metro: PROJECT DETAILS

Initiating the Project	Planning the Project	Executing the Project	Controlling and Monitoring the Project	Closing the Project
70.00	186.00	240.00	217.00	62.00

Description
 Objective of this project was to design separate umbrella and micro layer of coverage for Dhaka metro to ensure seamless mobility of subscribers. I assisted the project manager to prepare the project schedule. I led all the planning initiatives within the scope of this project until they were handed over to operation team. Successfully implementation of two different coverage layers was the key deliverables of this project. The project was closed on time upon receiving confirmation from drive testing team.

Initiating the Project	Planning the Project	Executing the Project	Controlling and Monitoring the Project	Closing the Project
54.00	142.00	264.00	155.00	61.00

Description
 Objective of this project was to identify the underutilized sites of the network and take actions to shift traffic from over utilized and highly utilized sites to underutilized ones. I had a remarkable contribution in scoping of this project. I used to issue necessary WOs to operation and deployment team for tuning parameter settings. This project was to bring down the number of underutilized sites below 2%. The project was closed on time upon confirming that 98% of the sites were having over 60% utilization.

--	---------------------------------------	--	---	-------------------------------------

Description
 Objective of this project was to plan 184 capacity sites that ensure the best fit for network's requirement and secure them for construction. As the project manager, I conducted the scoping session, created WBS and work schedule for the technical team. The key deliverable of this project was the list of finalized and secured 184 sites. In this project potential candidates were identified for capacity sites, join surveys were conducted and finally closed on time upon delivering 184 sites to deployment team for construction.

Initiating the Project	Planning the Project	Executing the Project	Controlling and Monitoring the Project	Closing the Project
34.00	108.00	81.00	74.00	40.00

Description
 Objective of this project was to trial a new radio equipment called Bi-Sector Antenna (BSA) to check its performance. I formed the project team, defined the project scope and created a business case of this project which was approved by the stakeholders. The key deliverable of this project was the decision whether to deploy this new radio equipment in the network. After an intensive team effort to fine tune the parameter setting, the project was closed on time with a positive feedback.

Initiating the Project	Planning the Project	Executing the Project	Controlling and Monitoring the Project	Closing the Project
82.00	224.00	179.00	194.00	67.00

Description
 Objective of this project was to modernize the Huawei network with the newly released hardware. As a project team member, I contributed in project scoping and scheduling. In this project, 1965 old model Huawei BTSs were identified and planned to be replaced by new model BTSs in order to capitalize the advanced features. I used to issue parameter tuning WOs for the newly installed BTSs to achieve the agreed GOS in clusters. The project was closed successfully on time when all 1965 BTSs were swapped.

Initiating the Project	Planning the Project	Executing the Project	Controlling and Monitoring the Project	Closing the Project
93.00	272.00	187.00	212.00	85.00

Description
 Objective of this project was to modernize the old RF antennas of the entire network. As a technical lead, I prepared the work schedule and drove the technical team accordingly throughout the project. In this project, 11723 old model RF antennas were identified and planned to be replaced by new model tri-band antennas in order to capitalize the high gain and multiple band compatibility. The project was closed on time when all 11723 old antennas were successfully replaced.
